## EDUCATION

---

### •J.C. Bose University of Science & Technology, YMCA, Faridabad

B.Tech. in Computer Engineering

2022 – 2026

### •Delhi Public School, Faridabad

CBSE (Class XII)

2022

### •Delhi Public School, Faridabad

CBSE (Class X)

2020

## EXPERIENCE

---

### •Codec Technologies Pvt. Ltd.

Sep 2025 – Dec 2025

Data Science Trainee

Remote

- Completed a 3-month AICTE & ICAC approved internship focused on data science concepts and applications.
- Worked on data preprocessing, analysis, and model development using Python-based data science tools.
- Applied machine learning techniques to real-world datasets and analytics workflows.

### •Codec Technologies Pvt. Ltd.

Nov 2025 – Dec 2025

MERN Stack Developer Trainee

Remote

- Completed a 1-month AICTE & ICAC approved internship focused on full-stack web development.
- Developed web application components using MongoDB, Express.js, React, and Node.js.
- Strengthened understanding of RESTful API integration and component-based UI development.

### •Genic Minds

May 2025 – Aug 2025

AI/Computer Vision Intern

Remote

- Worked on facial recognition and biometric verification systems using deep learning and computer vision pipelines.
- Developed feature-recognition models for livestock identity analysis using image embeddings and pattern classification techniques.
- Learned dataset preprocessing, annotation workflows, CNN-based model training, inference optimization, and OpenCV deployment pipelines.
- Improved model accuracy, feature extraction, and edge-device inference performance for practical AI deployments.

## PERSONAL PROJECTS

---

### •Intruder Detection System

Jan 2026 – Present

*AI-powered multi-camera surveillance platform*

Solo

- Built a FastAPI + Next.js surveillance system with real-time YOLO/OpenVINO inference on multiple camera streams.
- Implemented ROI-based intrusion detection, analytics dashboards, and authenticated WebSocket streaming.
- Designed a FAISS + Ollama retrieval chatbot for querying incident history in natural language.
- Containerized the stack using Docker Compose with MediaMTX and nginx routing.

### •Smart Locker – Facial Recognition Access Control

Nov 2025 – Jan 2026

*AI-based biometric authentication system*

Solo

- Developed a facial-recognition backend using InsightFace with multi-frame verification and liveness checks.
- Integrated YOLOv8/ONNX anti-spoof detection with PIN fallback authentication and rate-limited access policies.
- Implemented AES-encrypted embedding storage and ML-based behavioral anomaly detection.
- Built FastAPI REST APIs with Swagger documentation and interactive demo applications.

### •Akrut Labs Website

May 2025 – Aug 2025

*Production-ready IT consulting platform*

Solo

- Built a Next.js 16 and React 19 platform with Supabase-authenticated contact workflows and SSR session handling.
- Integrated Three.js visuals, Framer Motion interactions, and Cloudinary-based media galleries.
- Implemented Jest and Playwright testing pipelines for application reliability.

– Link: Website

•Zeshta – Luxury E-Commerce Frontend

*Cinematic storefront for heritage products*

Feb 2025 – Apr 2025

Solo

- Developed a highly animated Next.js storefront using GSAP, ScrollTrigger, Framer Motion, and React Three Fiber.
- Implemented App Router architecture, Zustand persistence, Lenis smooth scrolling, and reusable UI primitives.
- Designed a scalable TypeScript and Tailwind-based frontend with immersive storytelling-focused experiences.

•Boots N Booties – Footwear E-Commerce Platform

*Full-stack e-commerce platform*

Jan 2025 – Mar 2025

Solo

- Built a Next.js 16 and Prisma/PostgreSQL based footwear e-commerce platform deployed on Vercel.
- Integrated Cloudinary media pipelines and automated merchant notifications using Telegram Bot API and WhatsApp links.
- Designed reusable UI systems using Tailwind CSS and shadcn/ui.

•Distance Estimator – Monocular Depth System

*Real-time depth estimation and calibration*

Dec 2024 – Jan 2025

Solo

- Built a reusable monocular depth estimation module using MiDaS and OpenCV for metric distance prediction.
- Implemented calibration-based depth correction, smoothing pipelines, and live webcam inference utilities.
- Packaged the project with modular APIs and real-time visualization support.

•Real-Time Sign Language Detection

*Gesture recognition using MediaPipe and TensorFlow*

Sep 2024 – Nov 2024

Solo

- Developed an end-to-end gesture recognition pipeline using MediaPipe landmark extraction and TensorFlow models.
- Implemented dataset collection, preprocessing, training, and real-time OpenCV inference workflows.
- Optimized prediction pipelines for low-latency webcam-based recognition.

TECHNICAL SKILLS AND INTERESTS

Languages: Python, JavaScript, TypeScript, HTML5, CSS3, SQL

Developer Tools: Git, GitHub, VS Code, Docker, Postman, Firebase, Vercel, Netlify

Frameworks: React.js, Next.js, Tailwind CSS, FastAPI, Flask, Express.js, Node.js, OpenCV

Databases/Cloud: PostgreSQL, MongoDB, SQLite, Supabase, Firebase, Prisma ORM

AI/ML Technologies: YOLOv8, OpenVINO, TensorFlow, Keras, MediaPipe, FAISS, InsightFace, ONNX Runtime, scikit-learn

Libraries/Tools: Framer Motion, GSAP, Three.js, React Three Fiber, Zustand, Playwright, Jest

Core Concepts: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning, Computer Vision

Soft Skills: Problem Solving, Analytical Thinking, Self-Learning, Communication, Team Collaboration

Areas of Interest: AI Systems, Full-Stack Development, Computer Vision, Applied Machine Learning, UI/UX Engineering

CERTIFICATIONS

•Regression Analysis: Simplify Complex Data Relationships

*Google*

Mar 2026

•The Power of Statistics

*Google*

Feb 2026

•Go Beyond the Numbers: Translate Data into Insights

*Google*

Feb 2026

•Foundations of Data Science

*Google*

Feb 2026

•Advanced R Programming for Data Analytics in Business

*NPTEL (IIT Kanpur) | SWAYAM, Govt. of India*

12-week Online Certification

Jul – Oct 2025
